She has been participating in local and international art projects since 2010, and is an active participant of international interdisciplinary art exhibitions, biennials and triennials, has presented her body of work in 9 personal shows. Alongside, she organizes projects promoting graphic art, curates visual art shows.

Works are in [Mo museum](#) and private collections.

ARTIST STATEMENT

In her artistic practice, Elena Grudzinskaitė analyzes the relation among an individual, territory and the surrounding environment, as well as marginality and fragility of time and space parameters, and human impact on physical modifications of the environment. She is also interested in the concept of landscape that levitates somewhere between culture and nature, reality and fiction. Her works often acquire the shape of the transformed and synthesized landscape, thus becoming a condensate of reactions to the surrounding physical, social and cultural environment, like thoughts, reflections and inner discussions that have obtained visual expression.
