

- **3D printer Flashforge Dreamer and 3D printer Prusa I3 MK3s+**

Printing is performed using fused filament fabrication technology and thermoplastics.

3D printer Dreamer - maximum working volume is 23 x 15 x 14 cm (length x width x height). The following materials are used in the Print center: PLA, TPU plastics.

3D printer Prusa I3 MK3s+ - maximum working volume is 25 x 21 x 21 cm (length x width x height). The following materials are used in the press center: PLA, PETG, TPU plastics.

It is possible to order other types of plastics (inquire in advance at the Print center).

Actual cost of 3D printing depends on material type, desired printing parameters (layer height, wall thickness, internal density) and the complexity of the object.

Prices for 3D printing:

3D printing	Unit	Price
Average price for 3D printing	1 hr.	2,27 €
Preparations	1 hr.	6,18 €
